

The advantages of an  
ENERGY STAR®  
qualified home

[northwestenergystar.com](http://northwestenergystar.com)

ENERGY STAR homes are as much as 30% more efficient than homes built to code, making them some of the most energy efficient homes on the market today.

ENERGY STAR homes offer:

- **Enhanced Comfort**

Enjoy a home with even temperatures throughout the year. Tightly-sealed ductwork, high-performance windows and properly installed insulation make your home more comfortable.

- **Healthier Indoor Air**

Performance-tested ductwork keeps the air inside your home clean by reducing the possibility of drawing unwanted air from your home's attic, basement, crawl spaces and garage.

- **Savings**

Monthly energy bill savings typically outweigh any incremental mortgage costs for the ENERGY STAR package. These homes keep more money in your wallet and offer the potential for higher resale value.

- **Peace of Mind**

Relax knowing your home has been inspected and certified by an independent third party to meet ENERGY STAR standards.

- **A Better Future**

Choose a home that uses less energy, and you'll help contribute to a healthier environment and a better future for us all.
